

**Computer for developing  
counseling skills in machines.**

**Making a machine self-learn using A.G.I.**

# CHALLENGES

Lack of personal touch and therapeutic relationship during counseling sessions.

Most developed systems work as narrow AI and are not able to self adapt according to the need of the client.

Lack of domain expert's knowledge.

# SOLUTIONS

Steps followed to achieve the AGI in counseling sessions:

Identify the desired outcome and perform the goal setting.

Establish Rapport and Therapeutic Alliance or Relationship by compulor.

Compulor will define required interventions in the client's life – deploying them strategically within.

Train compulor to access complaints of clients.

Plan and introduce termination and Follow-up with compulor

# BENEFITS

Ensures that clients will be highly satisfied and get a chance to revise the life skills that they learn during regular counselling sessions.

Empowering client to implement skills at times of distress.
